

Colorcraft.us installation instructions for tub Deck Mount Tub Filler

480013

Have your faucet installed by a licensed plumber.

Turn your water off using your stops on the supply lines if you have them, or turn off the water to your building.

This faucet has 3/4 IPS inlets. The inlets will connect to your supply lines, this faucet comes with the nuts to fit right on your . If you are using flexible supply lines you will need a Pair of Clawfoot Faucet Ells (400676, Not found at your local hardware store.)

This is a deck mount faucet which will mount to the top ridge of your tub, this is not a common mounting. Your holes would have been drilled on the top of the tub,

To install the faucet you will need the bag of Mounting Hardware, your escutcheons, and your Faucet mounts. The escutcheons will go on the threaded tube as pictured to the right. Then slide the tube in to the tub hole. Slide the flexible nut on the tube, then slide the nut on the tube wider side of the nut facing the tub. Don't tighten down too much, just enough to hold it in place ish. Now you can thread the faucet mounts on the tubes. You will use the nut on the under side of the tub to get these in the right place for your faucet. (still do not tighten them down.) 8 in apart. (This is what allows this faucet to fit different with of tub holes.

To make up your handheld you will first Remove the nut on the top of the body of faucet., set aside. Keep this incase you ever want to add a riser for a shower.

This is where you will Now attach the hand held cradle. Using the Teflon tape to secure it is leak proof. The nut rotates so make sure you like the placement of the cradle attachment.

Colorcraft.us

Attach the hand held head to the hand held

Colorcraft.us

Your Hose Comes with rubber washers attached at each end. You will remove them and use these while on each end.

Attach the hose to the hand held cradle again using the washer.

Colorcraft.us

The other end of the hose will attach to your hand held. Using the other washer. Now you can place it in it's cradle.

When you turn on your water make sure someone is holding the hand held facing into the tub, IF your diverter is open for the handheld it is likely to pop out of the holder and chip in the tub.
